INTRODUCTION

What Our Identity is ?

Yearn4Finance (A superior for everybody to get rich) is a Blockchain innovation organization. Our central goal is to quicken the mass appropriation of advanced resources by connecting conventional and decentralized finance.

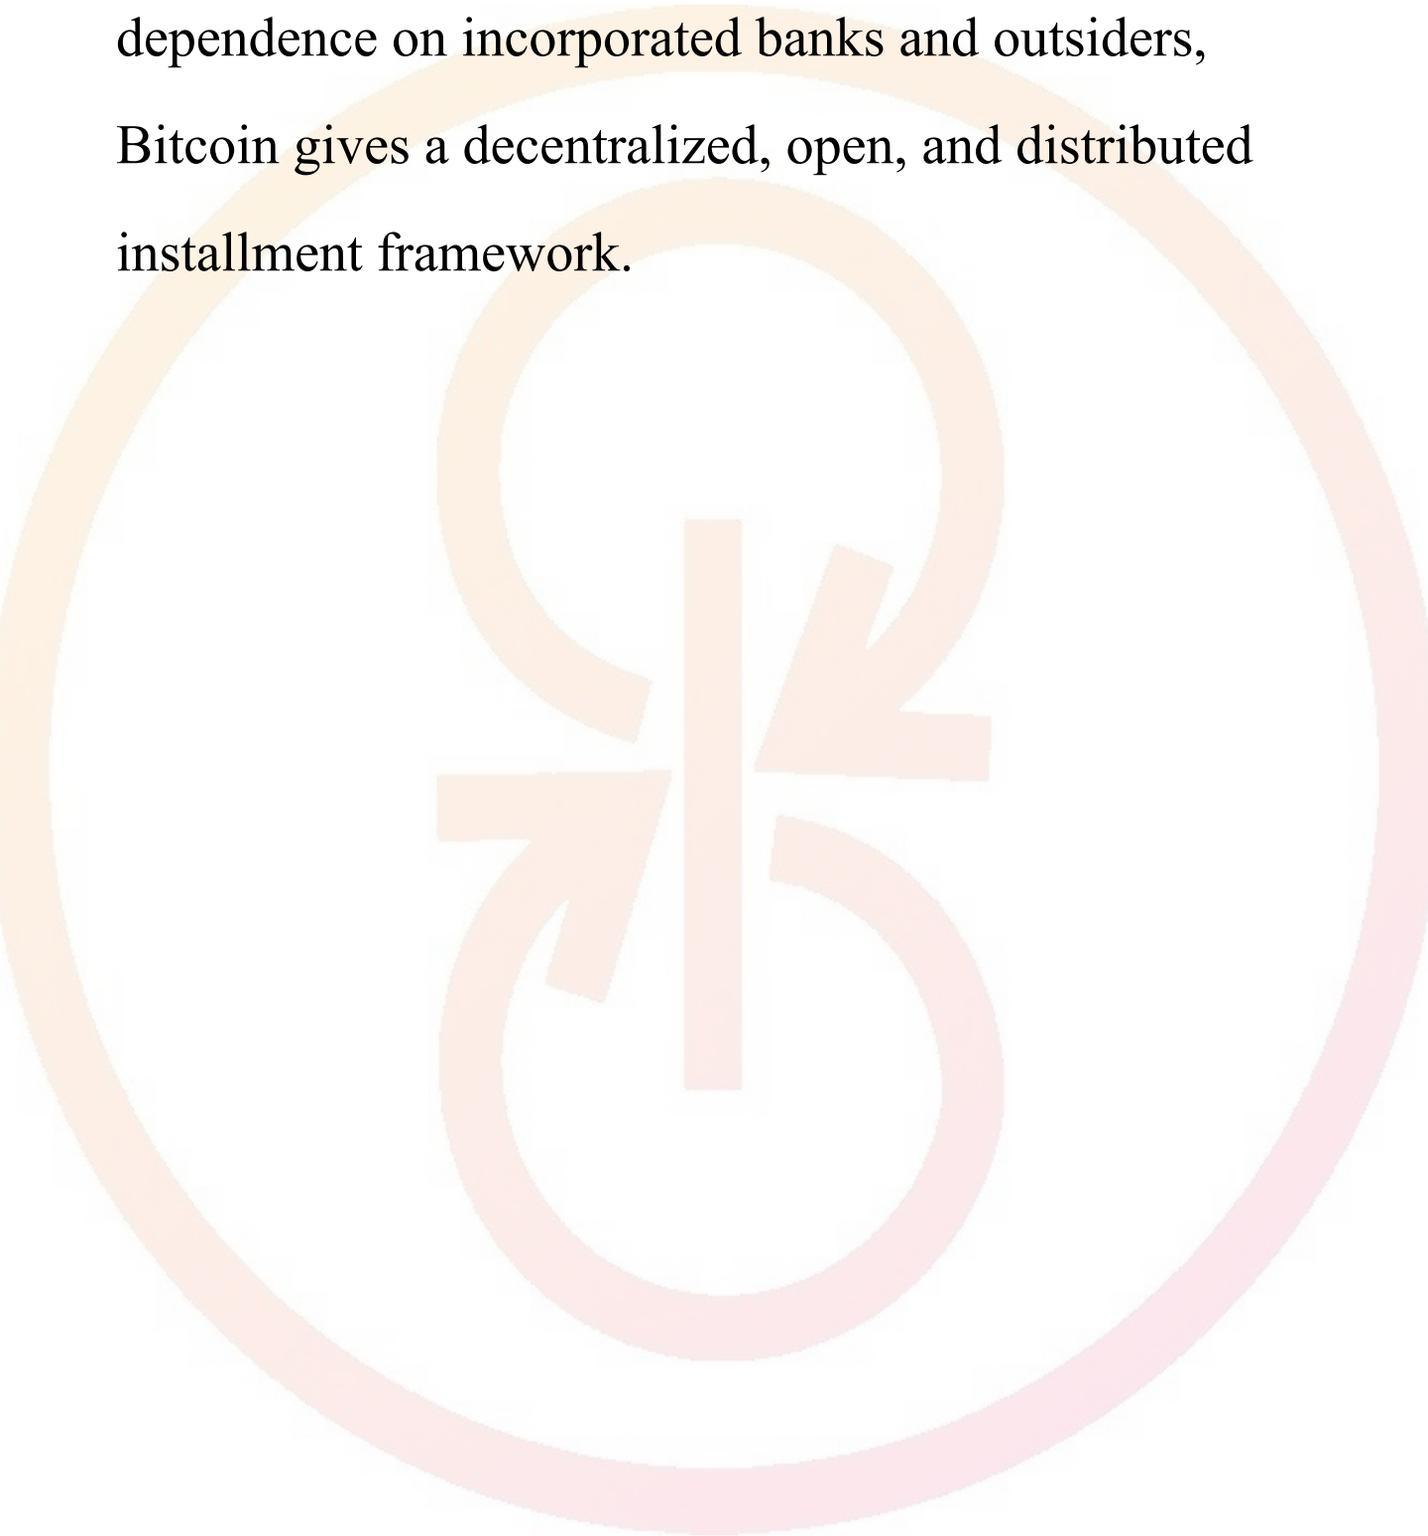

What is DeFi?

DeFi represents Decentralized Finance. It empowers a worldwide, open option in contrast to each money related assistance you use today — investment funds, credits, exchanging, protection and the sky is the limit from there — available to anybody on the planet with a cell phone and web association.

The world's budgetary framework needs updating. During a time of expanding globalization, cash moves despite everything depend on obsolete inheritance frameworks. Installment arrangements and budgetary administrations require various mediators and are frequently siloed. Most types of money are given and constrained by unified governments.

Bitcoin vs. Traditional Finance

Ten years back Bitcoin developed as an option worldwide installment framework. Its incentive is genuinely basic: rather than the conventional dependence on incorporated banks and outsiders, Bitcoin gives a decentralized, open, and distributed installment framework.

The Growth of Decentralized Finance (DeFi)

We predict a rising third stage, the Institutional Phase, where Bitcoin is progressively held as an advantage by monetary organizations, for example, banks, speculative stock investments, annuity reserves, sovereign riches reserves, blessing assets, and others. For what reason would they hold Bitcoin? It's a supporting instrument against the dangers characteristic in unified fiat monetary forms, obligation instruments, and values.

We predict a rising third stage, the Institutional Phase, where Bitcoin is progressively held as an advantage by monetary organizations, for example, banks, speculative stock investments, annuity reserves, sovereign riches reserves, blessing assets, and others. For what reason would they hold Bitcoin? It's a supporting instrument against the dangers characteristic in unified fiat monetary forms, obligation instruments, and values.

This Institutional Phase ought to inevitably observe even governments' national banks use Bitcoin as a hold resource close by gold, fiat monetary standards, obligation instruments, and so on. The development of the Bitcoin biological system after some time has converted into a gigantic increment in selection and worth. Be that as it may, with everchanging exchange charges, high unpredictability, long affirmation times, and a deflationary financial model, Bitcoin stays a superior store of significant worth than a money for every day use.

TOKENOMICS

Token contract details:

The Yearn4 Finance token is built under the Ethereum Network which makes it an ERC-20 token.

Total Supply: 30,000

Ticker name: YF4

Contract address:

0x38ACeFAd338b870373fB8c810fE705569E1C7225

Decimal: 18

Website: yearn4.finance

Private Sale:

We have a very detailed article on how we'll run our private sale, here's the medium post:

[https://medium.com/@yearn4.finance/yearn4-finance-3b7c06b8c0](https://medium.com/@yearn4.finance/yearn4-finance-3b7c06b8c076)

[76](#)

Total Supply : 30000 YF4

Uniswap Pool Allocation: 15000 YF4

Private Sale Allocation: 15000 YF4

Estimation price: \$ 5

1ETH = 89.02 YF4

Hard Cap : 168 ETH

Start Date : September 03, 2020

End Date : September 30, 2020 / Reach Hard Cap

Send Minimum 0.1 eth to get 8.902 YF4, Maximum 10 eth to get 890.20 YF4, for Each transaction send ethereum to address :

TOKENS ALLOCATION

Total supply : 30000 YF4
Private Sale : 15000 YF4
Uniswap Pool : 15000 YF4

FUNDS ALLOCATION

Development : 25 %
Listing : 30 %
Team : 20 %
Marketing : 25 %

Exchange Listings:

We have plans to list of reliable and trusted crypto exchanges once our token sale is completed or hits its softcap, we'll first get listed on Uniswap before considering other exchange listings.

Here's our listing target:

- UNISWAP

<https://app.uniswap.org/#/swap?inputCurrency=0x38acefad338b870373fb8c810fe705569e1c7225>

- P2PB2B https://p2pb2b.io/trade/YF4_ETH

- COINGECKO

<https://www.coingecko.com/en/coins/yearn4-finance>

- COINMARKETCAP

<https://coinmarketcap.com/currencies/yearn4-finance/>

- IDEX - ON PROCESS

- COINTIGER - ON PROCESS

- HOTBIT - ON PROCESS

We also expect our price to increase high up to \$1,000 +++.

The Platform is going to provide income generation opportunities for the YF4 holders. Staking and lending services will be built on our platform.

USE CASES

What is Crypto Staking?

Staking digital money implies you are holding cryptographic money to check exchanges and backing the system. In return for holding the crypto and fortify the system, you will get a prize. You can likewise call the an enthusiasm (For YF4 you get 20% APR). With marking you can produce an automated revenue by holding YF4. Other than that you get a prize, you can win additional when the coin increments in esteem.

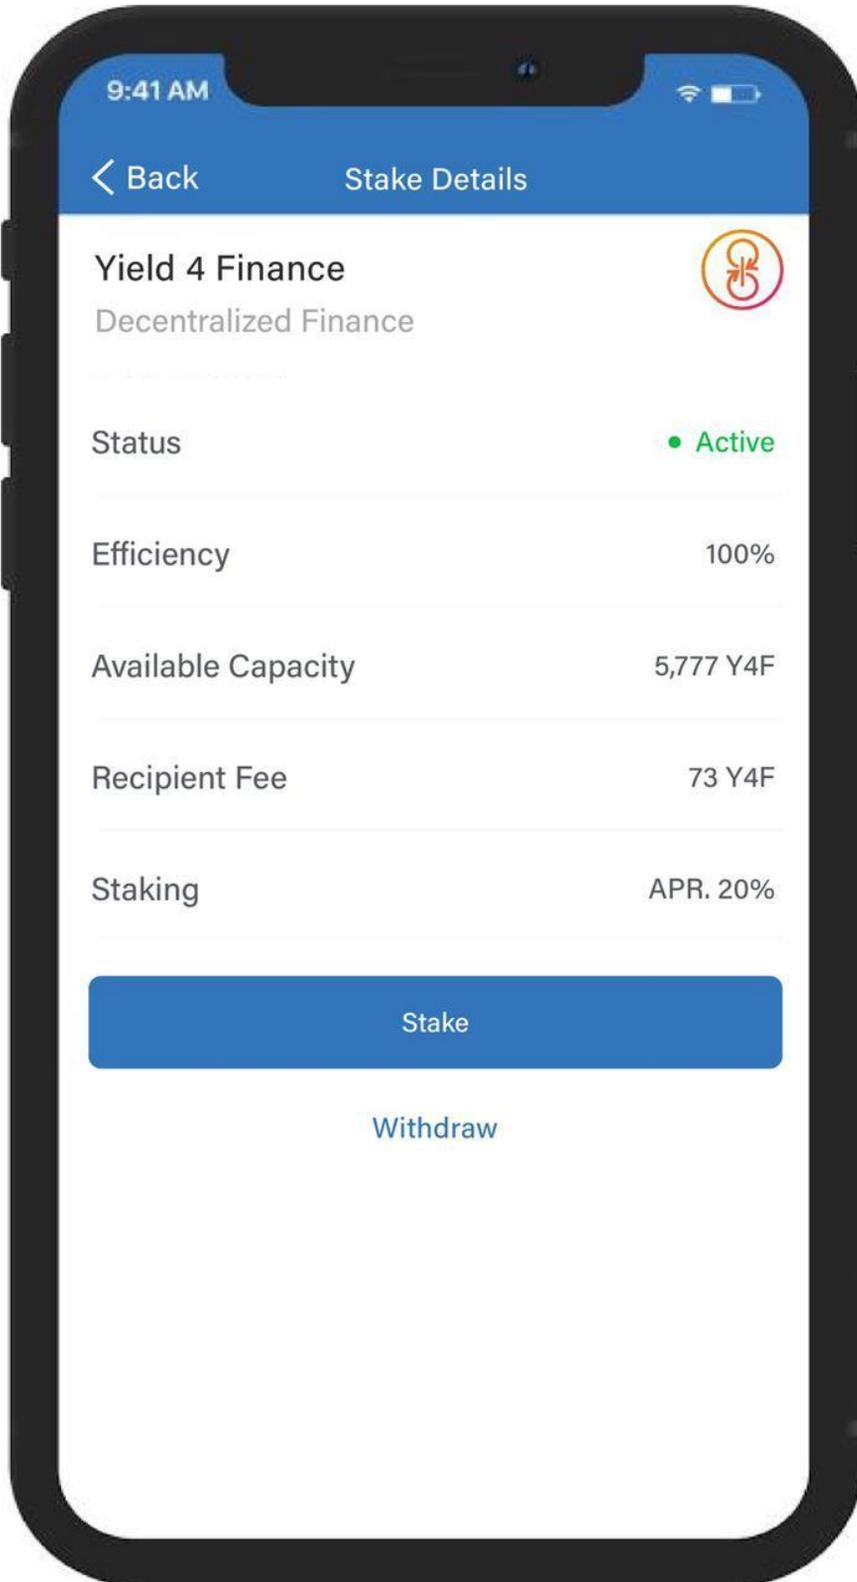

How does Yield 4 Finance Staking work?

It sounds basic; simply hold some YF4 and get a prize, however there is much more included. With the Proof-of-Work component, new squares should be dug for check of transactions. Bits one of those coins. With the Proof-of-Stake instrument, new squares are delivered and checked by staking. This implies you needn't bother with uncommon PCs to take care of troublesome mathematical questions, what the case is with mining. Staking is about what number of coins you are holding. The sum decides your prize. A client who has made sure about to a greater extent a specific coin is bound to be picked as the new square validator.

Other than the way that with staking, you offer help and reinforce the system, it likewise builds adaptability.

Applications:

We offer Staking for our users and we have a dedication wallet for staking.

Users can earn up to 20% APR on Staking YF4, we'll release an online wallet (web based), mobile wallet (it will be available on android and ios)

Note : All Staking Deposits in YF4 and ETH from Community Members will be added on Uniswap Pool and Locked as Liquidity on Unicrypt.

Staking rewards

With the staking of cryptocurrency you will receive a reward. This is usually a fixed percentage per year.

The percentage is an indication and could theoretically change, for YF4 it is 20% Annually, but it might likely change (increase), It is possible to receive rewards individually or using a pool. In a pool, multiple coin holders put their coins together to increase the chance of validating a block. As a result, the revenues can also be higher.

What are the advantages of Staking YF4?

- More and more investors are choosing crypto staking
- Generate a passive income; holding YF4 is sufficient to earn extra coins and you don't have to trade (risky).
- Low entry; anyone can join and you don't need much YF4 Tokens
- Simple and easy to use; our wallet has a very nice GUI (Graphical User Interface) and its easy to use
- Energy efficient; staking YF4 is better for the environment than mining

LENDING PLATFORM

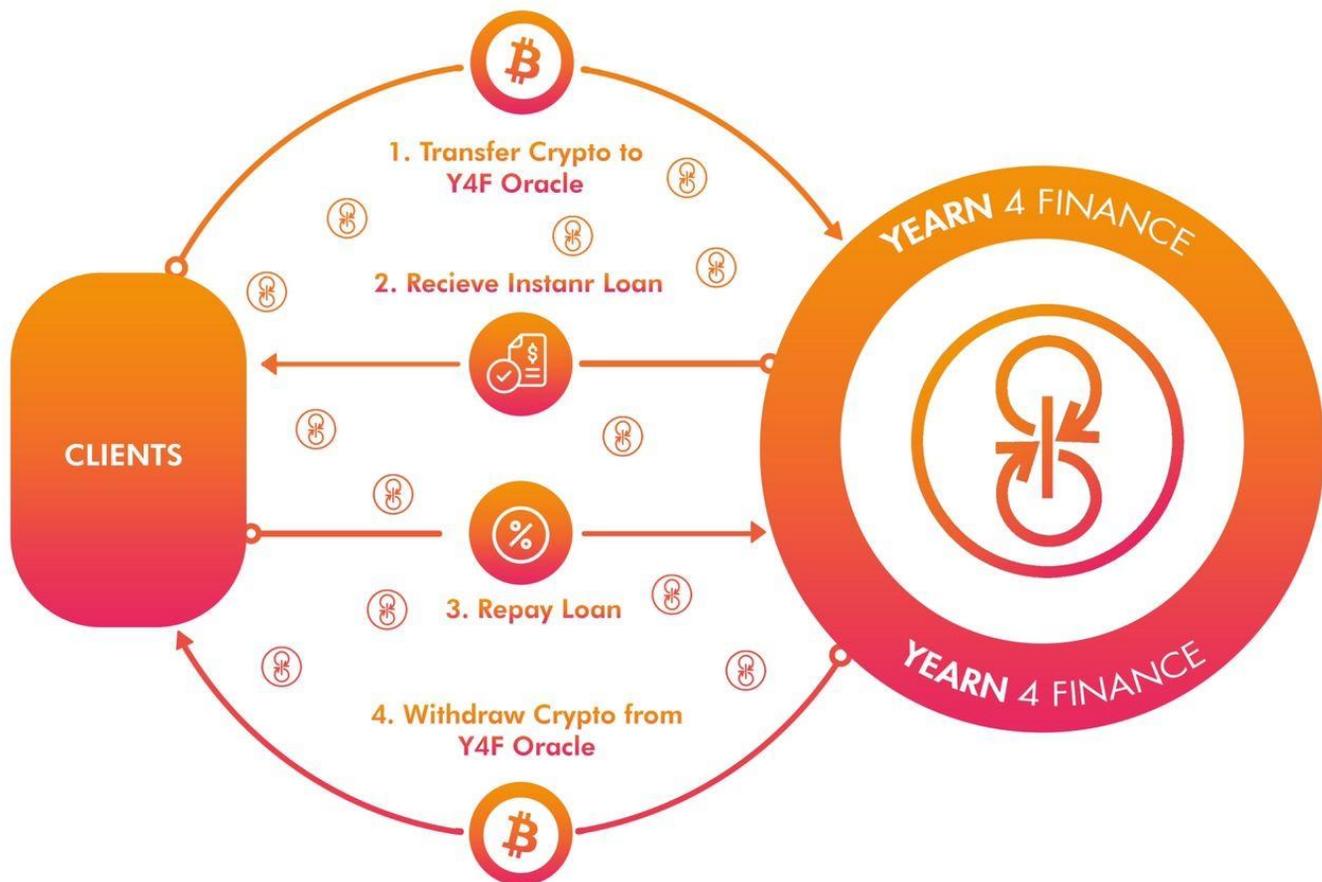

What is Crypto Lending?

At the center of crypto lending is a genuinely straightforward idea: Borrowers can utilize their crypto resources as security to acquire a fiat or stablecoin credit, while moneylenders give the benefits needed to the advance at a settled upon loan fee. This can likewise work in the converse, where borrowers use fiat or stablecoins as security to obtain crypto resources.

You'll probably see that there is nothing historic here — they are essentially collateralized advances — yet credit and lending are ground-breaking budgetary natives that open up a wide scope of utilizations and advantages for organizations, establishments, merchants and clients. Moreover, in the developing DeFi space, this crude has been opened for permissionless, open and composable lending access. This prompts new use cases like streamlined rates across stages and "blaze credits," in which a client can use nuclear exchanges to get up to a stage's full liquidity as long as they take care of it in a similar exchange .
